Profile

Hello! I'm Mohammed Razi, a creative and results-driven web developer with a knack for crafting elegant and user-friendly solutions. My passion lies in turning ideas into digital experiences that not only meet but exceed expectations. With a strong foundation in both front-end and back-end technologies, I bring a holistic approach to web development.

Professional Experience

Web Developer Intern   10/2023 — present

- Expert in HTML: Proficient in creating structured and semantic content for web applications.
- CSS Mastery: Skilled in using CSS to design visually appealing and responsive user interfaces.
- JavaScript Proficiency: Capable of implementing dynamic functionality to enhance user interactions.
  • User-Centric Approach: Dedicated to creating seamless and enjoyable web experiences through a blend of HTML, CSS, and JavaScript skills.

Education

Bachelor of Computer Application   07/2020 — 06/2023
Thiruvalluvar University

HSC   06/2019 — 04/2020
Anaikar Oriental (Arabic) Higher Secondary School

Projects

Cake shop 🔗
As part of my web development journey, I designed and developed a responsive cake shop website using Bootstrap, showcasing my skills, projects, and professional journey. The website is built on the Bootstrap framework, leveraging its grid system and components to ensure a consistent and visually appealing user experience across various devices.

To-Do list 🔗
As part of a hands-on JavaScript development project, I created a dynamic and interactive To-Do List application to enhance task management efficiency. The project focuses on utilizing JavaScript for creating a seamless user experience, allowing users to add, edit, and remove tasks dynamically.

Cash Register 🔗
In pursuit of practical application development, I undertook the creation of a Cash Register App using JavaScript, designed to streamline and automate the point of sale process. This project demonstrates my proficiency in JavaScript and showcases a user-friendly interface for cashiers and business owners.

Color Picker 🔗
In my exploration of front-end development, I designed and implemented a Color Picker application using JavaScript to provide users with an intuitive and interactive way to select and preview colors. This project showcases my skills in handling user interactions and dynamically updating the interface.
